

Snowmobile Trail Signs and Delineators

All new signs will be constructed on a minimum thickness of .040 Aluminum or .090 Poly HDPE stock with rounded corners and will be printed on retro-reflective sheeting equivalent to 3M Engineer Grade, 3M High Intensity and 3M Diamond Grade reflective sheeting also available for better conspicuity in low-light conditions. All new signs will not be yellow or red on the back side and will conform to within $\pm 0.50"$ of the following specifications:
